SAURABH DHARMENDRA KUMAR

has successfully completed the online Specialization

The Complete Ethical Hacking Bootcamp: Beginner To Advanced

Congratulations on completing "The Complete Ethical Hacking Bootcamp: Beginner To Advanced." This course covered penetration testing fundamentals, including setting up a pentesting lab with VirtualBox and Kali Linux and exploring Linux essentials, networking tools, and critical terminology. You mastered information gathering with tools like Nmap and techniques like Google hacking and DNS zone transfers. Additionally, you explored web application penetration testing with OWASP tools, BurpSuite, and injection attacks. Advanced modules included wireless penetration testing, system hacking, and exploitation with Metasploit, as well as topics like MITM attacks and developing tools like backdoors, keyloggers, and brute force attackers.
